Question:

If the points **A** (1, 2), **O** (0, 0) and **C** ( $a, b$ ) are collinear, then find the relation between  $a$  and  $b$ .

**Solution:**

Variable	Description
<b>A</b>	Point (1, 2)
<b>O</b>	(0, 0) point
<b>B</b>	( $a, b$ ) point
<b>a, b</b>	$x, y$ coordinates of point B between whom relation is to be found

TABLE I: Variables Used

First we should construct the collinearity matrix with the given points A,O,B

$$\begin{pmatrix} O - A \\ B - O \end{pmatrix} \quad (1)$$

$$\begin{pmatrix} -1 & -2 \\ a & b \end{pmatrix} \xrightarrow{R_2 \rightarrow R_2 - aR_1} \begin{pmatrix} -1 & -2 \\ 0 & b - 2a \end{pmatrix} \quad (2)$$

given that the three points are collinear, the rank of collinearity matrix should be 1 for that to occur, the  $R_2$  must be fully 0. Therefore,

$$b - 2a = 0 \quad (3)$$

$$\therefore b = 2a \quad (4)$$

The required relation between  $a$ , and  $b$  is,  $b = 2a$
